Harlan J. Berk, Ltd. has presented an innovation in antiquities and numismatics for some time now. The system is simple. When you want an antiquity or coin in the sale, just bid the estimated price by phone or mail. We will send you the antiquity or coin immediately. No waiting for the closing of the sale. Any and all antiquities or coins not sold before the closing date will be sent to the highest bidder on October 23, 2001.

**EXAMPLE**—You bid estimate on an item valued at \$100.00 and if your bid is the 1st to reach us, you will receive the item immediately. If on the other hand, you bid \$75.00 on the same item and are still the high bidder at the end of the sale, the item will be mailed to you on the closing date, October 23, 2001.

If you are ever in the area, stop in to see us! Of course, it's best to call first. Harlan J. Berk, Ltd. reserves the right to refuse any ridiculous bids.

Rx: Incuse square, divided into six irregular triangles. Zacynthus is an important island in the Ionian Sea, about ten miles off the coast of Elis. Homer mentions it frequently. Its one city bore the same name as the island. The present archaic coin was discussed in Numismatic Chronicle, 1885, where it was described as "apparently unique." We know of no examples beyond that coin, the Rosen specimen, and the coin offered here. Extremely rare; possibly the third known specimen. All Greek island coins are rare. In that this coin bears a tripod which is usually the symbol of the games and as the island of Zycanthus is off the coast of Elis, it is certainly possible that this coin was issued in conjunction with the Olympic Games, though admittedly this theory is absolutely unproven. Though this coin is accepted as an issue of Zacynthus there are some who feel it could be a Macedonian issue, but they are probably incorrect. Tripod in high relief. VF ..... 2200
